

The World Wide Web has spread across millions of household, so Internet has become the best platform for marketing today. So the best way to market yourself is by a portfolio website. With a portfolio website anyone can showcase their skills also give all available information about themselves to the client in one place. With this resume become easy to access whenever the client wants. It also is a good way to showcase all available projects with detailed information to anyone who is interested in hiring. Hence this project is about making my own portfolio website. This will be a dynamic website,

The project is aimed to build my own portfolio website for showcasing my resume. It will have various pages to display various aspects of my resume such as

1. Homepage:

This page will have navigation bar to easily access any part of the website. It will have option to download my resume from the database as well as the option for my resume to be directly mailed to him

2. About Me:

This page shows all the details about me. My personal information that my employer should know about me would be displayed here

3. My skills:

This shows all the skills that I have represented by some charts so it gets easy to understand. All skills and technologies that I know would be clubbed together according to their domain so that I gets easy to bifurcate. Example all the web technologies that I know will be shown together.

4. Resume:

This page shows all the key aspects of my resume . It will contain a table showing all my educational qualification , all the extra curriculum activities that I was a part of , details about my previous and current work-experience

5. Projects:

This page shows list of all the projects that I have worked on. Detailed information would be shown to the registered users only. It will have link to various website where I have posted the project such as github or the competition for which the project was made.

6. References:

This page has all the details about my previous employers. Their name ,designation , company name , few things that they would like to say about me and their contact information would be show here for anyone to verify my previous work experience. This data will come from database so for me it gets easier to add details whenever an update is to me made.

7. Blogs:

This page shows a list of blogs that I have written .My research about various topics can be posted here . links to all papers published and description about them would be show here

8. Contact Me:

This page shows all the information needed to contact me .It also has fields which customers can fill to send me a message directly which I can later access through admin login

9. Edit Page:

This page is for admin only where he is able to add, update ,delete fields in the database so it gets easier to update the resume.

10.Login/sign up:

This page is for users to register to view more information about me or download my resume and also for admin to login and access admin features such as edit page

This portfolio website would mainly have two type of users. First would be the admin that is me whose resume is going to be show cased . Admin when logged in using his username and password would be shown the website normally as show to everyone else . Admin would have an extra edit feature to make any changes required in the resume . Update , delete , add all functions can be done with the edit option in edit tab . The second user would be the customer who has can view my resume. Customer can register using the sign up page to be able to download my profile and also be able to view more details. For example the customer can view my project general information without registering but to see detailed information about the project would require to register using the sign up feature .

Proposed features of each account type:

Admin

- Admin can view all the pages to know how it will look to the user
- Admin can update, delete, add new data to the table by logging in his account

Customer

- Customer can view my portfolio website
- Customer can register on website to view more details
- Customer contact me with the contact me page
- Customer can Download my resume

This website will be made using various web technologies such as

1. Html

We use html as to map the skeleton for the website. The website will functionality and navigation between pages would be done with the help of html

2. CSS

We use css to make the website presentable . Editing the design of the website would be done with CSS

3. Javascript

We use javascript to manage all button functionality of the website. Validation would be done with javascript

4. PHP

PHP would act as a medium between database and the website. All the data that would be shown on the website would be brought by PHP

5. Mysql

We manage the database using mysql. We use mysql queries to add ,delete ,update fields in the database

We will be using Xampp for our server and in order to create our website

Database Testing:

Query test 1 :

✓ Showing rows 0 - 5 (6 total, Query took 0.0055 seconds.)

```
select * from reference
```

☐ Show all | Number of rows: 25 | Filter rows: Search this table | Sort by

+ Options

				rid	imagename	name	position			
<input type="checkbox"/>		Edit		Copy		Delete	1	joe.jpg	JOE RODRIGUEZ	Developer/Musician
<input type="checkbox"/>		Edit		Copy		Delete	2	rosy.jpg	ROSY CORONADO	PSYCHOLOGIST
<input type="checkbox"/>		Edit		Copy		Delete	3	yury.jpg	YURY JAJITZKY	CEO/Developer
<input type="checkbox"/>		Edit		Copy		Delete	4	kyss.jpg	KYSS CHIRINOS	Marketing/Designer
<input type="checkbox"/>		Edit		Copy		Delete	5	carhil.jpg	CARHIL MATOS	CEO/Developer
<input type="checkbox"/>		Edit		Copy		Delete	6	leo.jpg	MARK ZUCKERBERG	Marketing/Designer

Query test 2 :

✓ Showing rows 0 - 2 (3 total, Query took 0.0020 seconds.)

```
SELECT * FROM hire
```

☐ Profiling [Edit inline] [Edit] [Explain SQL] [Create PHP code] [Refresh]

☐ Show all | Number of rows: 25 | Filter rows: Search this table | Sort by key: None

+ Options

				hid	imagename	price	skillone	skilltwo	skillthree	skillfour	skillfive			
<input type="checkbox"/>		Edit		Copy		Delete	1	car4.png	\$300	Design for Natural People	Logo	Advrestising Image to print	Photo Editing	
<input type="checkbox"/>		Edit		Copy		Delete	2	car5.png	\$650	Information Web Design	Logo	Photo Editing	Site Construction	Maintenance for 6 months
<input type="checkbox"/>		Edit		Copy		Delete	3	car6.png	\$1450	3D Character Design	Character Sketch	Digitiaztion and Development	Animation	Video Demo

Query test 3 :

✓ Showing rows 0 - 4 (5 total, Query took 0.0019 seconds.)

SELECT * FROM resume

Profiling [E]

Show all

Number of rows: 25 ▼

Filter rows: Search this table

Sort by key: None

+ Options

				rid	cname	position	startdate	enddate
<input type="checkbox"/>	Edit	Copy	Delete	1	Diaz Apps	Intern	July 2016	Present
<input type="checkbox"/>	Edit	Copy	Delete	2	Nestle Venezuela	Front End Developer	Jan 2014	Dec 2015
<input type="checkbox"/>	Edit	Copy	Delete	3	Polar Food CA	Manager Web Development	Jan 2013	Dec 2013
<input type="checkbox"/>	Edit	Copy	Delete	4	Nestle Venezuela	Intern	July 2012	Dec 2013
<input type="checkbox"/>	Edit	Copy	Delete	5	Government of State Lara	Intern	July 2006	Dec 2010

The website is available for guest user to view all the time but in order to download my cv the user must login or he will be prompted to the login screen with appropriate message.

Please Login First to download CV

Log in

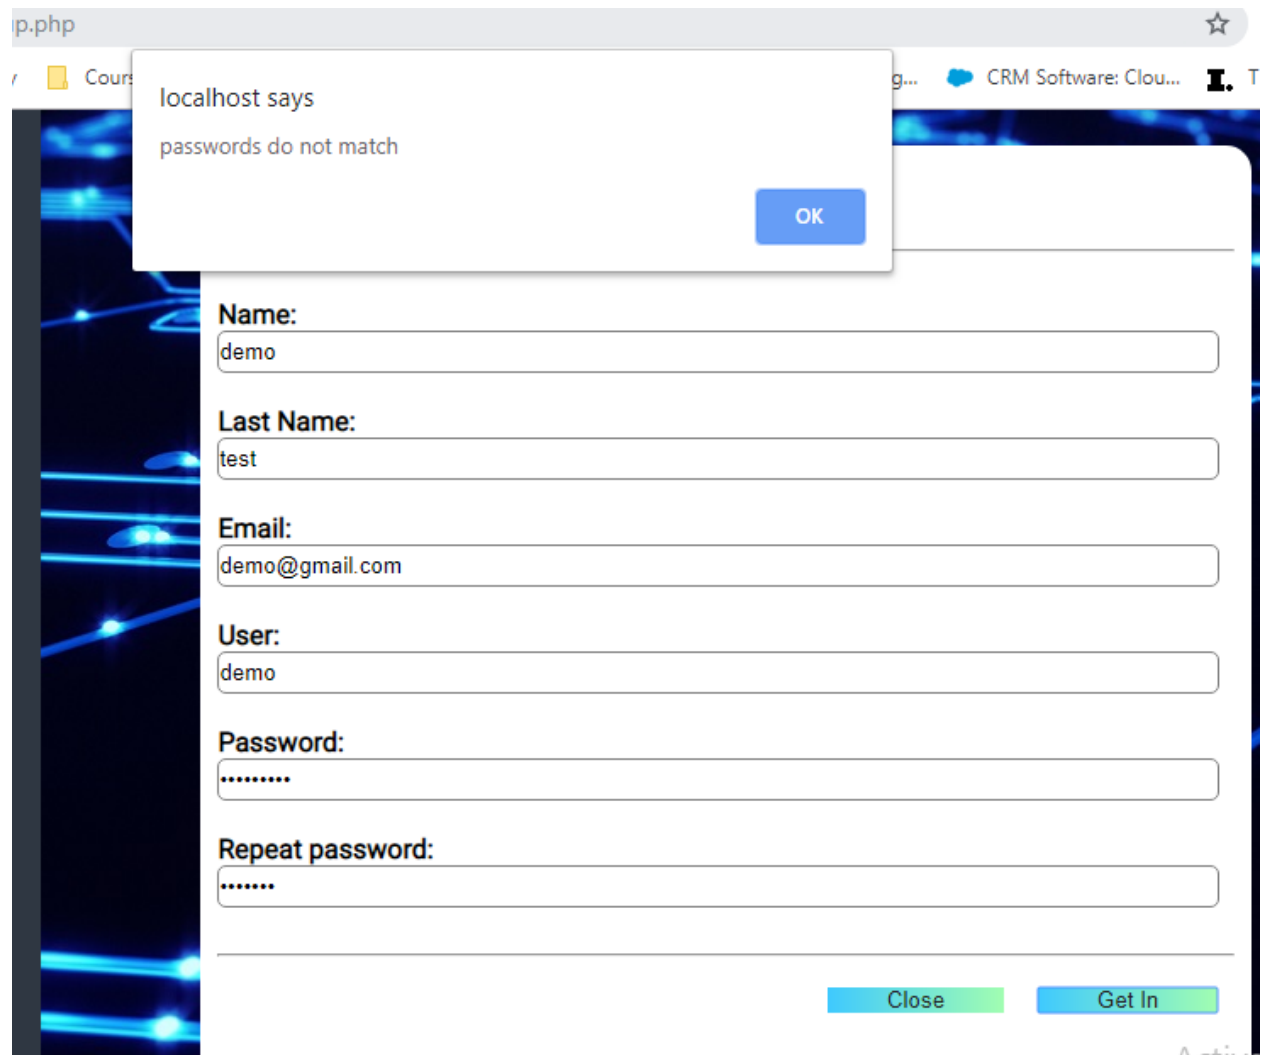

User:

Password:

CloseGet In

User can signup with the signup page which has proper validations and errors are displayed appropriately.

Example javascript error here:

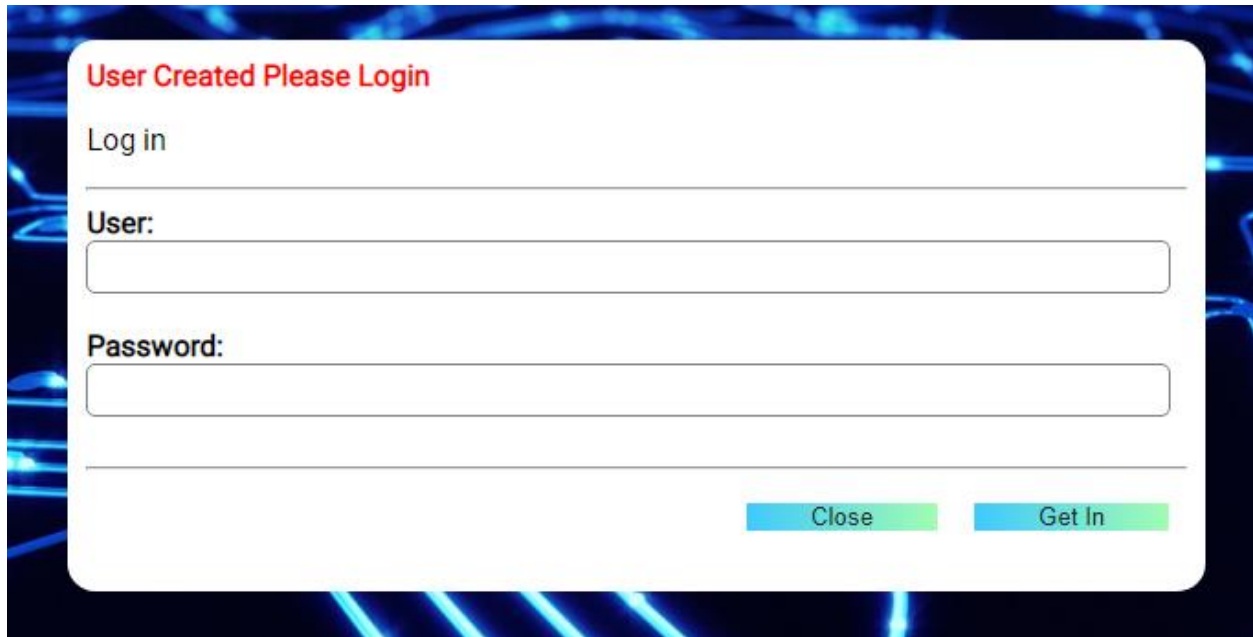

The screenshot shows a web browser window with a URL bar containing 'ip.php'. A JavaScript error dialog box is displayed in the foreground, titled 'localhost says', with the message 'passwords do not match' and an 'OK' button. The background shows a signup form with the following fields and values:

- Name:** demo
- Last Name:** test
- Email:** demo@gmail.com
- User:** demo
- Password:**
- Repeat password:**

At the bottom right of the form, there are two buttons: 'Close' and 'Get In'.

Once user profile is created the user will be sent to login page where he must login with his proper credential

A dialog box titled "User Created Please Login" in red text. It contains a "Log in" label, a "User:" label with an input field, and a "Password:" label with an input field. At the bottom right, there are two buttons: "Close" and "Get In".

User Created Please Login

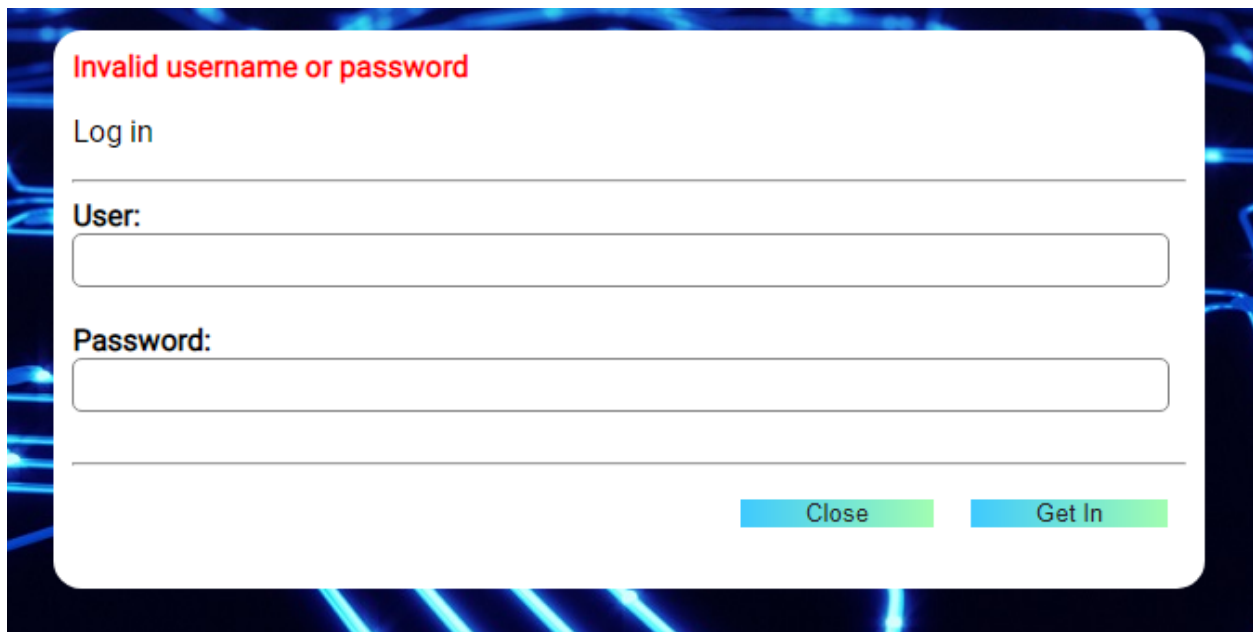

Log in

User:

Password:

Close Get In

Php error will be displayed whenever required :

A dialog box titled "Invalid username or password" in red text. It contains a "Log in" label, a "User:" label with an input field, and a "Password:" label with an input field. At the bottom right, there are two buttons: "Close" and "Get In".

Invalid username or password

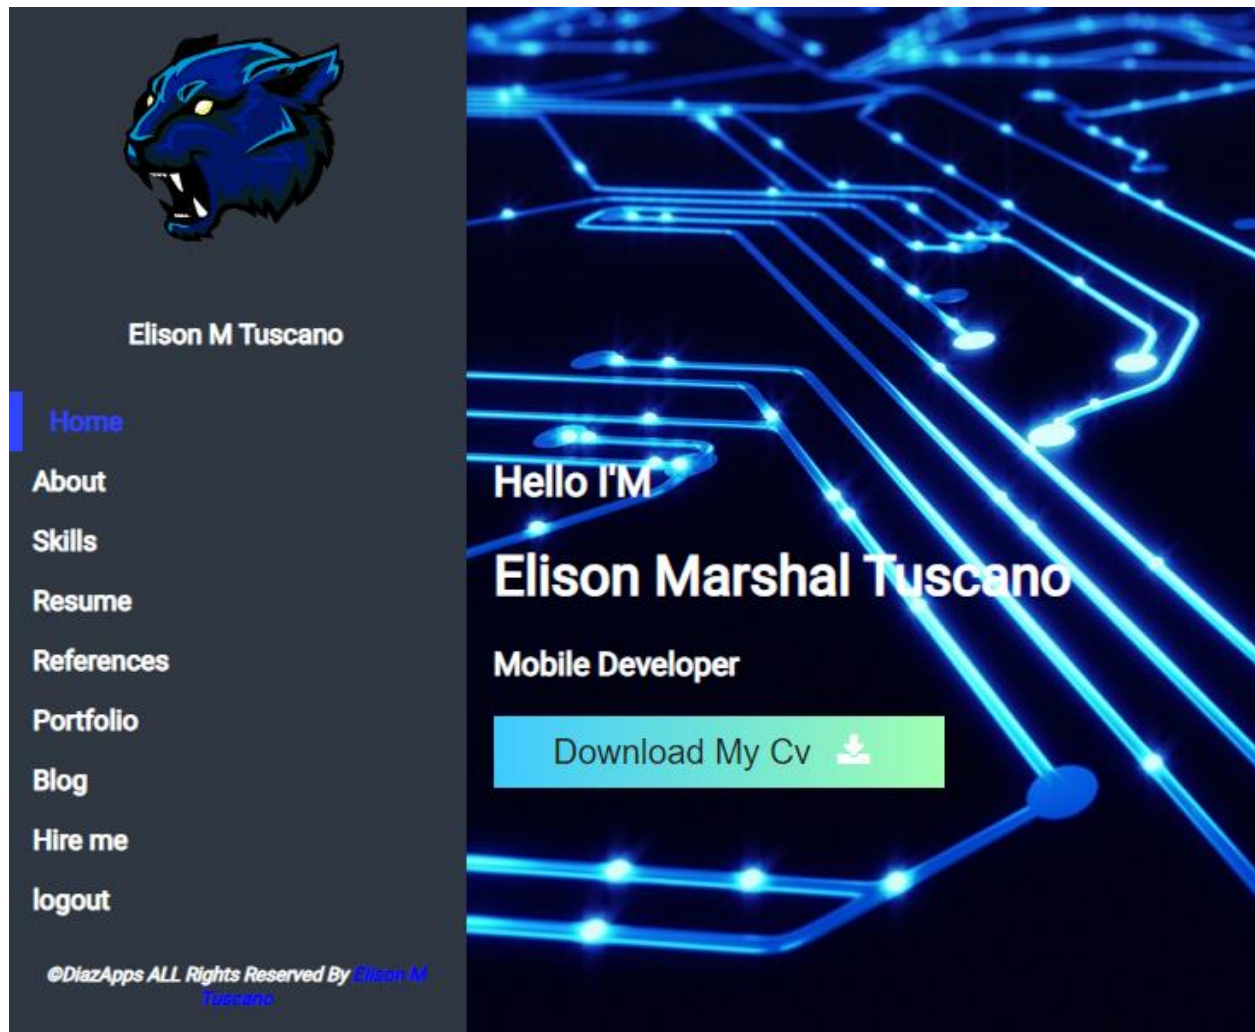

Log in

User:

Password:

Close Get In

Once login credentials are checked the user will be directed to homepage where he can download the cv. We have used session to determine if user has logged in so accordingly login and signup would be replaced by logout.

If admin is logged in the system then he will be directed to adminpage from the loginpage . Admin can view the database on adminpage. He is also able to add , update and delete in database from adminpage.
